⚠ SHARED INPUTS

These keys trigger more than one mod with the same press. Rebind one of them in MCM if that gets in the way.

- Num 1 Open lean position editor (Lean v2 — CLIKRΔD) + Companions: cycle readiness (Useful Idiots (REDone Combat AI))
- Num 3 Laser settings panel (Laser Settings) + Companions: move to point (Useful Idiots (REDone Combat AI))
- ; Toggle health HUD (Body Health System (GAMMA Meds)) + Waypoint on/off (Personal Adjustable Waypoint)
- / Minimap toggle (Minimap Toggle) + Cartography mode (Personal Adjustable Waypoint)
- \ PDA taskboard (PDA Taskboard) + Teleport squad to you (Fair Fast Travel)

TAP VS. HOLD ON THE SAME KEY

These keys split actions by tap and hold. A tap-mode action fires on key-down, so holding the key can fire it as well.

- F tap: ledge grab · 2×: inspect weapon · hold: throw glowstick (plus the game's Use)
- H tap: exo PSU power · hold: gas mask on/off
- ' tap: PAW quick pin · hold: quick action wheel
- R tap: reload, which also unjams a jammed weapon · hold: ammo check

CINEMATIC CAMERA CONTROLS

Press - to fly the camera. It takes every key until you exit.

- W A S D move
- Ctrl + W / S up / down
- ⇧ fast · V toggle slow · wheel: cycle speed
- - or Esc exit
